Contributions of Team Members

Zachary Johnson did the Abstract, Introduction, Django REST API portion of the Develop Prototype, Demo Prototype, and Changes Needed to Software Design 2 hours.

Logan Long did the Prototype Objectives & Functionality, and Evaluate Prototype. Logan worked on the project for approximately 2 hours.

Nathan Yocum worked on the Prototype Objectives & Functionality, the Frontend portion of the Develop prototype section, and the Changes Needed to the Software Design. Nathan worked on the prototype for around 16 hours and on the report for around 2 hours.

All three members were involved with checking each other's work and removing errors.
